Sports customization system

The Team Sports Customization System by Insta creates stock numbers in 8" outline or shadow and stock letters in 2" block with a 228 heat press machine. Stock numbers and letters are available in black or white and are made in Insta's durable Superflex heat transfer, which

is opaque and can be applied to cotton, polyester and some nylons. Insta's Model 228 features a 15" X 20" swing away upper platen, center pressure placement, a continuous coiled heating element, built-in digital controller and a sliding pressure scale.

Hoopless stabilizer

American Embroidery Supply offers Eco-Stick, an environmentally-friendly hoopless adhesive stabilizer designed to prevent hoop burn when embroidering delicate fabrics. It supports medium-density stitch counts up to approximately 12,000 stitches. For higher or denser stitch counts, another layer of product can be hooped or floated under the hoop. The excess is said to tear away easily from the stitches and the rest dissolves in water with the first wash. The nonwoven stabilizer is constructed of part water-soluble and part non-water-soluble materials, so while most of the stabilizer dissolves after an initial full wash, it leaves the soluble fibers under the stitching to give the embroidery the support it needs to keep the design looking sharp and crisp throughout the life of the garment. Made using a wet-laid nonwoven process to ensure it is non-directional and dense, Eco-Stick uses needle-friendly pressure-sensitive adhesive. It comes in pre-cut 8" X 8" sheets or in 8" and 11.5" widths by 25- and 50-yard rolls.

Heat press

Stahls' ID Direct offers limited-edition American Pride heat presses from Stahls' Hotronix in Fusion and Auto Clam models. The upper platen on the presses features a sublimated image of the American flag. Only 300 of these presses will be offered, each press will be individually numbered, and are available to U.S. customers only. Stahls' will donate \$100 from each American Pride heat press sold through September 5,

2011 to the USO. The Hotronix Fusion features a swinger and draw design and is equipped with an exclusive touch-screen technology, among other features. The Hotronix Auto Clam features a hands free magnetic auto-open and magnetic-assist lock down design, providing semi-automatic functionality without the need for an air compressor.
