

MAGNETIC BOBBINS

Madeira USA has added Coats Trusew Magnetic bobbins, which can be used anywhere that tension consistency is required or on material where overspin is an issue. They are available in Style L with 135 yards and are packaged 100 per box. The bobbins measure 30 grams at the outer edge, the middle and around the inner core.

COMMERCIAL EMBROIDERY MACHINE

Hirsch Intl. now offers the Tajima TFMX-IIC 1508-436, a full-featured 8-head commercial embroidery machine. It has a 32-bit controller that runs at 300MHz and uses the Windows CE operating system. The machine includes a thin film transistor LCD MicroSmart screen and memory to hold two million stitches, as well as a USB drive and a uni-sash design. The needle bar stroke has been increased from 45mm to 47mm for smoother operation and more precise sewing. The adjustable thread take-up system, which is patent-pending, has improved sewing quality, with its adjustable tension device being located close to the needle.

FUSIBLE MESH

Diagonal No Show Nylon Mesh from Cotswold Industries now comes in a fusible version, which prevents the fabric from shifting or stretching in the hoop. It is made with a specially formulated low-melt adhesive that bonds at 260°F. One layer of Diagonal Fusible Mesh supports between 10,000 and 12,000 stitches in a moderately dense design and comes in 15" x 25 yards, 20" x 25 yards and 30" x 50 yards.

DO-IT-YOURSELF DISPLAY

From Pulse comes Customizable Workspaces, a feature offered in the 2010 version of Tajima DG/ML that provides a customizable screen to match a user's preferences, which can be saved for instant retrieval. Users can customize a floating, dockable window to their preferences and then lock it into place anywhere on the screen. Customizable hot keys let users create shortcuts, and they also can create their own toolbars and choose minimal or full-screen modes.

PRINT/CUT MEDIA

ColorPrint Evolution is the latest in digital print-and-cut media from Siser North America. It is a colorfast, high-opacity media designed to be used with digital printers and can be stretched without losing shape and registration. It features a polyester backing and can be used on everything except nylon, treated or sublimation-dyed fabrics.
